Local and General

Mr. Dave Wylie, of the Washington Alberta Land Co's south east ranch, is having his full share of trouble at the present time. Mrs. Wylie has been sick for the past month, and now he has had one of his children taken to the hospital at Calgary in a serious condition with appendicitis. We wish better luck in the future for Dave.

The demand for men at present is in excess of those available, and quite a number could be placed if they were at disposal.

We noticed Mr. A. F. Smith and some of his men were very busy at the local lumber yard at the beginning of the week building a bunk car to complete his threshing outfit.

The 12th Mounted Rifles left Calgary last week for the firing line. Amongst them were seven of our local boys. Where, did you say, Berlin? Well let us hope so.

Mr. L. Russell has been favored with big crops this season. After last week's announcement of a good crop of oats comes a bumper crop of wheat. Mr. J. Gunsolly threshed out 3,160 bushels of wheat off 100 acres of stubble.

The Bishop of Calgary will visit Crossfield, on Sunday, Oct. 24th, for the purpose of dedicating the Vases and Church Organ kindly presented by Mrs. Russell Boyle, in memory of the late Lt.-Col. Boyle.

There will be Morning Prayer at 11 o'clock, followed by Holy Communion, and His Lordship will give an address. A hearty invitation is extended to all to be present on this occasion.

Next Sunday, October 17th, being Children's Day throughout the Anglican Church in Canada, children's hymns will be sung at the morning service, and an address will be given by the Rev. J. P. Dingle. Parents and children are cordially invited.

The shipment of this years grain from the Crossfield elevators has commenced. The first car from the Alberta Pacific Elevator was dispatched last week end and two cars have left this week.

Norman Deacon Dingle, a law student with Messrs. Muir, Jephson, Adams and Brownlee, of Calgary, and brother of the Rev. J. P. Dingle, left for McGill University on Thursday last week where he will train with the 4th University Company for service at the front.

As Mrs. A. Gordon and children were being driven to the station at Red Deer to proceed to Crossfield by train they met with a mishap and her eldest boy being thrown out, Mrs. Gordon falling on him. The extent of the little fellow's injuries were not realized till they arrived home when it was discovered he had a fractured leg, and as a length of time had intervened between the accident and the doctor being called the limb had become much swollen. On Monday it was decided to take him to the hospital at Calgary.

There will be an Entertainment and Dance at the Inverlea School, on Friday, October 29th. Proceeds in aid of Red Cross Funds. Refreshments provided. Gentlemen \$1.00. Ladies free.

Call at the Chronicle Office and ask to see our new samples of private Greeting Cards for Christmas.

The Difference

Kipling could take a worthless sheet of paper and write a poem, and make it worth \$10,000.

That's Genius.

There are some men who can write a few lines on a piece of paper and make it worth \$50,000,000.

That's Capital.

A ditch-digger works ten hours and handles several tons of earth for \$3.00.

That's Labour.

A woman can purchase a hat for \$2.75, but prefers to pay \$27.00.

That's Foolishness.

There are many concerns in the country who tell you they can serve you as well as your home merchant.

That's Nerve.

Everybody who is posted and want the best in Goods or Workmanship buy from us.

That's Common Sense.

W. McRory & Sons,

HARDWARE SPECIALISTS AND HEATING EXPERTS.

CROSSFIELD DISTRICT ASSOCIATION U.F.A.

"Folks say I'm sad,
I'm really glad,"
Sad Iron cried with glee,
"Although I'm 'flat,'
I'm bright at that,
Old Dutch has polished me."

MADE IN CANADA

Dealing With Enemy

Department of Trade and Commerce Asks Firms to be Careful

The department of trade and commerce has issued a statement urging that Canadian firms conducting business with Germany should do so through British or neutral firms rather than through the agency of German firms, however much they may be deceived by their promises. The government has been advised of hides from Uruguay being shipped to United States ports for transshipment to Canada through German firms in Uruguay. This virtually means trading with the enemy.

There is also evidence of Germans working through Dutch firms and offering to supply goods that formerly came from enemy countries. Warnings have been issued against Canadians patronizing such houses operating under the guise of Dutch manufacturers.

A Foe to Asthma—Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the innermost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Miss Miranda Brown and Angelina Johnson were in the midst of a rather heated argument as to the meaning of "circumstantial" evidence, when old Uncle Bastille poked his woolly head in at the door. He was immediately alleged to give his worthy opinion on the matter in question.

"De way Ah undstand it, fum de way it's been 'outlined to me," announced the old fellow, "circumstantial evidence is de fedders dat yo' leaves lyin' round."

TWO WOMEN SAVED FROM OPERATIONS

By Lydia E. Pinkham's Vegetable Compound—Their Own Stories Here Told.

Edmonton, Alberta, Can. — "I think it is no more than right for me to thank you for what your kind advice and Lydia E. Pinkham's Vegetable Compound have done for me.

"When I wrote to you some time ago I was a very sick woman suffering from female troubles. I had organic inflammation and could not stand or walk any distance. At last I was confined to my bed, and the doctor said I would have to go through an operation, but this I refused to do. A friend advised Lydia E. Pinkham's Vegetable Compound, and now, after using three bottles of it, I feel like a new woman. I most heartily recommend your medicine to all women who suffer with female troubles. I have also taken Lydia E. Pinkham's Liver Pills, and think they are fine. I will never be without the medicine in the house."—Mrs. R. B. Carter-Resairie, Neb.

The Other Case.

Beatrice, Neb. — "Just after my marriage my left side began to pain me and the pain got so severe at times that I suffered terribly with it. I visited three doctors and each one wanted to operate on me but I would not consent to an operation. I heard of the good Lydia E. Pinkham's Vegetable Compound was doing for others and used several bottles of it with the result that I have been bothered with my side since then. I am in good health and I have two little girls."—Mrs. R. B. Carter-Resairie, Neb.

W. N. U. 1972

Moving the Crops

Big Crop Will Swell the Earnings of Railways

After a long period of decreasing earnings, broken only occasionally by improvements which were not maintained, the Canadian railways are likely to receive a long hoped for and well deserved increase in earnings as a result of the enormous grain crop this year. It is estimated that in moving the total grain crop of more than half a billion bushels the three roads will earn between \$40,000,000 and \$50,000,000, and the effect of this both on the roads themselves and on other branches of commerce will be very great. From the wheat crop alone it is calculated that a sum of \$24,000,000 will be earned.

For a long time the steady drop in railway earnings has been a cause of some concern. Various reasons have been written for the situation, among others being the falling off in immigration, the business depression and the increased competition of one road against another.

In no one branch of commercial activity, however, does the harvest go so greatly to swell prosperity, or the reverse as in the Canadian railways. These roads, whose western business has been steadily developing and increasing with the growth of the country is not of enormous proportions during the entire year, depend to a large extent on the harvest.

St. Joseph, Texas, July 14, 1903.

Minard's Liniment Co., Limited.
Gentlemen,—I was badly kicked by my horse last May and after using several preparations on my leg nothing would do. My leg was black and red. I was laid up in bed for a fortnight and could not walk. After using three bottles of your MINARD'S LINIMENT I was perfectly cured, so that I could start on the road.

JOS. DUBBS, Commercial Traveller.

German Hatred of Prussia

A good deal of interest naturally attaches itself to the following quotation from Helme, Germany's greatest epic poet, which was written in 1822: "I regard this Prussian Eagle with apprehension, while others vainly his daring glances toward the sun, I look the more attentively at his talons."

"I could not trust this Prussia, this tall, plastic hero in gaiters, this braggart, with the capacious maw carrying a corporal's staff, which he first dips in holy water before bringing it down upon one's head."

"I had great misgivings about this medley of beer, deceit and Brandenburg."

"Repulsive, deeply repulsive to me, was ever this Prussia, this podestatic, hypocritical, sanctimonious Prussia—this Tartuffe among nations."

"Prussia has made use of its most thunderous demagogues to preach to the world that all Germany ought to be Prussian—Hegel himself has been obliged to demonstrate the advantages of servility."

George (nervously)—I'd like the best in the world, Kitty, to marry you, but I don't know how to propose.

Kitty (promptly and practically)—That's all right, George. You've finished with me; now go to papa.

Contractors in the British Empire and Colonial Governments.

London, Eng. WINDSOR, ONT. New York, U.S.A.

B.C. and Yukon Soldiers Many Soldiers Military district No. 11, comprising British Columbia and the Yukon has raised 21,161 troops, of whom 17,370 have enlisted for overseas service, according to figures published by headquarters. Already 12,000 troops have left British Columbia and are either on the firing line or at Shorncliffe. The aggregate strength of the overseas battalions and other units for the front now in training in the province is 192 officers and 8,178 men. On this basis of enlistment, to population, all Canada responded in the same ratio, the forces of the Dominion would number 400,000 men.

A Cure For Fever and Ague—Disturbance of the stomach and liver always precede attacks of fever and ague, showing derangement of the digestive organs and deterioration in the quality of the blood. In these ailments Farme's Vegetable Pills have been found most effective, abating the fever and subduing the ague in a few days. There are many who are subject to these distressing disturbances and to these there is no better preparation procurable as a means of relief.

Commander—What's his character, apart from his leave-breaking?
Petty Officer—Well, sir, this man 'e goes ashore when 'e likes; 'e comes off when 'e likes; 'e uses 'orrible language when 'e's spoken to; in fact, from 'e's general behaviour, 'e might be an officer."

Disablement Fund Grows

The disbursement fund which is being started under the auspices of the Military Hospital commission, of which Senator Loughheed is president, is off to a good start.

James Carruthers, the Montreal millionaire grain man, has contributed \$100,000 towards the fund. Other generous contributions have also been received and will be announced later.

No surgical operation is necessary in removing corns if Holloway's Corn Cure be used.

A certain nobleman, talking to an American friend about the antiquity of his family, was told roughly that he was "a mere mushroom."

"How is that?" he asked, indignantly.
"Why," said the other, "when I was in Wales a pedigree of a particular family was shown to me which filled more than five large parchment skins, and near the middle of it was a note in the margin. About this time the world was created."

Minard's Liniment Cures Dandruff.

"Janet, dear," said a careful mother to her seven-year-old daughter, "your Uncle Edward will be here for dinner today. Be sure to wash your face and hands before coming to the table."

"Yes, mother," hesitatingly, "but—suppose he doesn't come?"

NO BURNED BREAD

NO SCORCHED BISCUITS

No need to apologize to family or guest when MOONEY does it. MOONEY'S BISCUITS are always right — every biscuit inspected before it is packed — and they are as fresh as the product of your own oven.

MOONEY'S PERFECTION SODA BISCUITS

are the great favorites for every day use.

They are made in the big sanitary factory in Winnipeg and come to you in air-tight packages or in sealed tins as you prefer.

"LET MOONEY
DO IT"

Customs Receipts Very Satisfactory
Customs receipts for the month of August, 1915, according to official figures amount to \$5,300,000. This total is very slightly under that of August, 1914, when receipts showed the result of the heavy warehousing of bonded liquors in anticipation of the tariff increase. The receipts for August last year exceeded those of last month by only \$53,392.50.

The statement for this year is accordingly regarded by officials of the customs department as in every way satisfactory. The receipts for the five months of the present fiscal year for all departments amounted to \$26,731,165.81, against \$27,125,622.22 for the corresponding period of 1914-15.

Red Cross Notes. • Empire Defenders.

The Red Cross Society acknowledges with thanks the following donations and work:

Proceeds of tea at Mrs. Davies, Oct. 6th, \$2.40.
Sewing Circle, 2 M.-T. bandages, 43 T. bandages, 14 hndks.
Inverlea School, 9 hndks, 2 wash-rags.
Mrs. A. Fraser, 6 washrags, 2 M.-T. bandages.
Ina Fraser, 1 washrag.
Georgina Brawn, 10 hndks.
Winifred Brawn, 2 " "
Mrs. Wm. Hills, 7 " "
Mrs. Schofield, 2 night shirts.
Mrs. M. Donald, 12 M.-T. bandages.

Mrs. Morrison, 1 pair socks.
Mrs. Wigle, 18 hndks.
Mrs. Baker, 3 M.-T. bandages.
Ruth Baker, 14 hndks.
Maie Ruddy, 2 washrags.
Mrs. Mossop, 4 washrags.
The Sewing Circle will meet this week at the home of Mrs. Conrad, next Friday, Oct. 22nd, at Mrs. Jessiman.

Commission of Conservation Sixth Annual Report.

Kven casual reference to the annual reports of the Commission of Conservation indicates the wide range of interests with which the Commission is concerned. In this respect, the Commission's Sixth Annual Report, which has just been issued, is no exception. Well-informed discussions are given concerning Canada's resources in forests, fields, mines and streams, and important papers are included on technical education, agricultural instruction, providing sanctuaries for birds and last, but by no means least, an important place is given to housing and town planning.

The address of the chairman, Sir Clifford Sifton, is an excellent summary of the Commission's activities for the last fiscal year, and is, therefore, of value to the busy reader.

Although the war has hampered some aspects of the work of the Commission, steady progress has been made in the matter of town planning. The National City Planning Conference held in Toronto in 1914, gave a marked impetus in Canada to this important economic and social question. Shortly after the holding of the conference, the Commission secured the services of Mr. Thos. Adams of London, England, an expert of international repute. Although in Canada less than a year, Mr. Adams' services are in requisition constantly in every province of the Dominion. His address at the annual meeting of the Commission outlines the present status of housing and town planning with both clearness and vigor.

In the conservation of forests steady progress has also been made. Inventories of Canadian forests are being compiled by the Commission for the first time, and much has been done during the past year to lessen the number of forest fires along railway lines. With but few exceptions, the Commission has had the hearty support of the railways in this work. As a result, great forest areas undoubtedly have been saved from the ravages of fire. These and other phases of Canadian forestry questions are considered in the report by such well-known authorities as Dr. B. E. Fernow, Messrs. R. H. Campbell, H. R. MacMillan, G. C. Piche and A. D. MacTear.

The agricultural surveys and illustration farms operated for some years by the Commission have proved of such value that the Federal Department of Agriculture has recently taken over the work and is largely extending it. Reports of this work are of much interest to everyone who is interested in agriculture. Dr. C. G. James' address on the working of the Agricultural Instruction Act is a pleasing story of recent progress of Agricultural instruction in Canada.

Canada's mineral resources are considered at length by Dr. Frank B. Adams, by Dr. Eugene Hazelton and by Mr. W. J. Dick. In connection with water-powers, especially as applying to boundary waters, interesting and valuable papers by Messrs. A. V. White and Leo G. Denis are included in the report. The report is splendidly illustrated, and a carefully prepared index makes it of unusual value for reference purposes.

We hear that one result of possible further raids by Zeppelins is a boom in the fancy pyjama trade in London.

We print below a list of the men from the Crossfield district who have joined the ranks of our Empire Defenders.

Should any names have been omitted and any of our readers be able to supply us with the same we should be glad to include same.

Lieut. Col. R. L. Boyle, 10th Batt. Killed in Action.

10 CENTS PER PLUG

The Mystery of the Ravenspurs

By Fred M. White

Ward, Lock & Co., Limited
London, Melbourne and Toronto

(Continued)

"You see, I have already admitted myself to circumstances," she said when Geoffrey had asked politely and feelingly after the injured foot. "The donkey and I are old friends and Jessy got the cart for me. So I am all right. By the way, what is it I hear about your finding a body down on the sands?"

"It is quite true," Geoffrey said gravely. "The body of Dr. Tchigor-sky."

"Tchigor-sky? Dr. Tchigor-sky? Do you really mean that?"

"The smooth pretty voice had risen to a hoarse scream. Disappointment, joy, relief danced across the woman's gleaming eyes. At the moment she seemed to forget that she had a companion."

"What a dreadful thing!" she said catching her natural voice again. "How did it happen?"

Geoffrey gave her the details without omitting anything.

"It was a bit of shock for us," he said, "but we are accustomed to them. Of course it will be brought in that the poor fellow met with an accident, but there is not the slightest doubt that the poor fellow was murdered."

"Murdered! Why should you say that?"

"I don't know. Of course I have no evidence, but Tchigor-sky chose to interest himself in our affairs, and he has paid the penalty. That was the last I saw of him."

"So that poor child actually saw the corpse! How terrible!"

"Morton did not seem to mind. She is small and slender, but has courage and resolution."

Mrs. May nodded. She had received information that was a long way from being distasteful to her. She pined Geoffrey with questions as to what Tchigor-sky had said and done, but Geoffrey evaded them all. Tchigor-sky had said nothing; he had had a vague idea at what he was going to do.

"I knew him indeed," said Mrs. May. "Oh, indeed," Geoffrey replied. "He never mentioned the fact."

Mrs. May drew a long breath. Evidently she had nothing to fear. Her own enemy had gone to his account, leaving no mischief behind. Sooner or later the man would have had to be removed; now he had gone away, leaving all the trouble. Really, it was very considerate of Tchigor-sky.

"You might come to the inquiry and say he was a friend of yours," said Geoffrey.

Mrs. May looked at him sharply. Had she said too much or did he suspect? But Geoffrey's eyes were clear and innocent of meaning. Mrs. May shuddered. These kind of horrors made her ill, she said.

"Pray do not mention that fact," she implored. "It can do you no good and it may cause a great deal of harm."

Geoffrey disclaimed every intention of making mischief. Besides, as Mrs. May pointed out, there was his uncle Halpi. Geoffrey shrugged his shoulders.

"It is a hard thing to say," he murmured, "but my poor uncle's testimony would not carry much weight. That accident he had some years ago injured his brain. But he is harmless."

Mrs. May exchanged a few more or less banal remarks with her companion and drove on. She had got nothing out of Geoffrey, but he had baffled her, and what was more, had succeeded in leaving a set of lively suspicions to sleep.

The inquest turned out as he had anticipated. A surgeon testified to the fact that the deceased died of his death by drowning, and that the injury to the face was doubtless caused by a fall on the rocks. Beyond that, the condition of the body was normal.

Geoffrey's evidence was plain before the point. He repudiated the suggestion that the family enemy had had anything to do with the death. Dr. Tchigor-sky was merely a passing visitor; he had met with an accident, and there was no end of the matter. It was impossible to say more than that. Then, to the disappointment of those who had come prepared to be thrilled with sensational details, the inquest was over almost before it had begun.

Directed by the coroner, the jury brought in a verdict of "Found drowned." The death certificate came by his death there was no evidence to show that it was not a natural death. The coroner ordered the servants to clear the house.

"See that they are all at once," he said. "Half an hour ago I found two women—ladies, I suppose they call themselves—in the picture gallery with guide books in their hands. Really, there is no sense of decency nowadays."

The curious crowd were forced back and once more Ravenspur resumed its normal aspect.

"I will see to the burial," Ravenspur said. "The poor man seems to have been murdered. Geoffrey, you will see that all proper arrangements are made for the funeral."

Geoffrey bowed his head gravely. "Yes, sir," he said. "I will see to that."

CHAPTER XXXV.

Mrs. May Learns Something

Mrs. May sat among her flowers after dinner. She had dined well with herself. It had been a source of satisfaction to her the body of her worst enemy had been found in the village churchyard that afternoon.

For years she had planned for the death of that man and for years he had eluded her. To strike him down foully had been too dangerous, for had he not told her that he was prepared for that kind of death? Had he not arranged it so that a score of savages in Europe should learn the truth with a month of his decease?

"And kindly fate has removed him from me," she said as she puffed with indignation at one of her new cigarettes. "There is no longer any danger. What have I to fear now from this wiser than I? He has nothing. They will see that Tchigor-sky has died a natural death and will destroy those packages. I can rest now."

"A strange luck over the lovely face, a look that boded ill for somebody. Then the whole expression changed. Geoffrey crossed the room and he had him that afternoon; she had asked him to come and he had had planned to do so. That Mrs. May had struck you to the floor. You gave it to me, saying you never turned a request like that down."

"Citizen (graver)—Yes?"

"Stranger—Well, are you still game?"

"There, there!" said Mrs. Blue-Thyrs, picking up her tea tray. "You have hurt his eye, 'don't cry, you man, like mamma!'"

"Harry—Paw, what is a henpecked husband?"

"That man whose nerve is in his wife's name."

"ST. VITUS' DANCE."

Hamilton, Ont.—"While I have not had occasion to use Dr. Pierce's Golden Medical Discovery, I have observed its good effects. My brother used it for St. Vitus' Dance. A neighbor recommended it and he began taking it at the age of ten. He had tried different remedies but they had no effect. He is now a healthy boy, and has been well since."

Mrs. Hamilton, 227 Murray St., Hamilton, Ont.

"A HUMAN MATCH FACTORY"

The body contains phosphorus sufficient to make 48,000 matches. Phosphorus is one of four elements composing the body—divided among bones, flesh, nervous system and other organs.

Phosphorus is the element which gives the body a perfect balance of the elements. These elements come from the food we eat—the stomach extracts and distributes them.

But if the stomach is deranged the balance of health is destroyed and the blood does not carry the proper elements to the organs of the body. It is blood trouble—nervous trouble—rheumatism—gout—heart trouble. Pain is the hungry cry of starved organs. The liver, stomach and organs of digestion and nutrition lose condition of health. That is just what is done by Dr. Pierce's Golden Medical Discovery, which has been so favorably known for nearly 50 years. It is now put up in tablet form, as well as liquid, and can be obtained of medicine dealers everywhere or by mail by sending 50 cents in 1c. stamps for trial box—address Dr. Pierce, Invalids' Hotel, Buffalo, N. Y.

Dr. Pierce's Pleasant Pills are the original little liver pills first put up nearly 50 years ago. They regulate and purify the blood, and are the best medicine for all liver troubles. Sufferers should be sure to get the original. Sufferers should be sure to get the original. Sufferers should be sure to get the original.

BRITAIN'S AIR SERVICE

Change Made Owing to Its Rapid Expansion

Owing to the rapid expansion of the Royal Naval Air Service, both with regard to the number of aircraft and the number of personnel, the Admiralty has decided to place it under the direction of a flag officer with the title of director of the air service.

Commodore M. F. Satter, the present director of the air service, will be in charge of the naval air service, with the title of superintendent of aircraft construction.

Commodore M. F. Satter, the present director of the air service, will be in charge of the naval air service, with the title of superintendent of aircraft construction.

Commodore M. F. Satter, the present director of the air service, will be in charge of the naval air service, with the title of superintendent of aircraft construction.

Crop Exceeds All Expectations

When one of the leading millers of the country speaks of a 300,000,000 bushel wheat crop and a possibility of 400,000,000, it is about time that the public woke up to the realization of the measure of success which has attended the present season's operations. It has far exceeded what the most optimistic of us dared to hope for, and the stimulus which it must give the country will influence our whole future to an enormous extent.—Edmonton Journal.

Vacant Lot Gardens

Excellent Results Secured, but Precautions Against Weeds Required

Reports from various cities and towns in Canada as well as to the cultivation of vacant lots indicate that the campaign inaugurated last spring for greater production of food is making good progress. In a systematic manner, and have secured results commensurate to the amount of energy expended.

Some of the following interest to lag have been only partially successful. In others, also, circumstances militated against success in that unemployed men took up the cultivation of vacant lots, and upon securing employment, neglected them. On the whole, however, the movement can be regarded as a distinct success. No estimate of the value of the product is available, but, judging from the enthusiasm of some of the vacant lot gardeners, the total value is large.

There is one danger from the vacant lot garden, however, to which attention must be drawn, namely, the growth of noxious weeds in the newly cultivated land. Too often, on the removal of the crop, the ground is given over to weeds. Organisms handling the vacant lot work should be particularly careful to guard against early attention; otherwise, the lots will not only prove a menace to the land in the future, but the spread of weed seeds, but create antagonism to the movement on the part of the occupiers of the neighboring land.

Bulgaria's Aid

Could Put Over 300,000 Soldiers in the Field

In refusing to allow Germany and Austria to send millions of war troops into the Balkans, the Rumanian government gave strong proof of its friendly attitude towards Great Britain and her allies. This has been followed by similar action on the part of Bulgaria, King Ferdinand being assisted to a ministerial decree a few days ago forbidding the passage of war troops through Bulgaria into Rumania. Viewed in the light of Premier Asquith's outspoken remarks in one house or another to the effect that Great Britain was preparing to give assistance to the Rumanian and neutral countries which were likely to be drawn still closer to the allies, this step by the two Balkan states is highly significant.

Military observers agree that no harder blow has been struck by Turkey than this cutting off of her supplies, and the prediction is made that Austria will attempt to force a passage to the Turkish border. Such an effort would be a serious blow to the enemy, for the slightest offense in this direction would bring a declaration of war from both Bulgaria and Rumania. It will not be surprising if these nations lose little time in entering the conflict anyway, for it would be plain to them that their only hope of success lay in the assistance of the Entente and their ally. There is every indication that the newly elected parliament in Bulgaria will take it in that way, so far as Greece is concerned, and its attitude undoubtedly is having a tremendous influence upon Rumania and Bulgaria. The latter, however, observes calmly, will throw in its lot with the allies in spite of certain railway concessions that Turkey is reported to have made to the Bulgarian government.

If Bulgaria should enter the war on the side of the allies it would be in a position to put between 300,000 and 400,000 first class soldiers in the field. While the population is only 4,400,000, about 2,600,000 less than that of Rumania, a very large proportion of the male population is trained to fight.

The women are ready to take the places of the men. In all kinds of domestic work. The Bulgarian navy, of course, is of little importance, as it consists only of a torpedo boat or two and a few small steamers. But it could not be the military strength of Bulgaria that would mean so much to the allies it would be the ease with which allied forces could pass over Bulgarian territory to the Dardanelles that would count most. With such a mass of trained soldiers, the British and French squad would be in possession of Constantinople.—Daily Telegraph, St. John.

Toys Allowed to Pass

Johnny had lost his heart-hearted. His decision to let ships bearing toys from Germany to go through should make him a hero among the children of the folk of the United States.—Brooklyn Eagle.

Stovepipes should be thoroughly cleaned of household refuse before use in the autumn, not only as a precaution against fire, but because the soot acts as an insulator and keeps the pipe cool. Instead of the heat radiating from a warm pipe, it is carried up the chimney and wasted.

Non-Agricultural Lands

Prevent Waste Land Should be Utilized for Growth of Timber

Optimistic as we have been in this country, we seem to have been unable to see any value worth caring for in our non-agricultural lands. Our vision was broad enough years ago, when we heard of agricultural lands in the Peace River valley, to recognize that such lands, while unused at the time, would within a decade or two grow crops and support a population. We may look across the future to the time when our far northern mineral deposits, though inaccessible and incapable of development at present, will develop centres of industry. But we travel daily across the non-agricultural lands which surround many of our most densely settled communities and across our transcontinental railways and we see in such lands no asset.

This attitude is both dangerous and unfair to the country. We must realize that our present stands of merchantable timber cannot support our growing industries indefinitely. The growing American demand for forest products, to which in a very few decades the supply of timber in the great market in Europe than now exists, will very rapidly wipe out our eastern merchantable timber. The forest of Brunswick, speeded up by foreign markets, is cutting each year from its lands more than the annual forest growth.—H. B. MacMillan, at 1915 Annual Meeting of Commission of Conservation.

Optimistic as we have been in this country, we seem to have been unable to see any value worth caring for in our non-agricultural lands. Our vision was broad enough years ago, when we heard of agricultural lands in the Peace River valley, to recognize that such lands, while unused at the time, would within a decade or two grow crops and support a population. Big Loss Through Hail

Saskatchewan Farmers Have Lost Heavily This Year

Saskatchewan farmers have lost this year through hail, over \$2,000,000, according to a conservative estimate made by the Saskatchewan hail commission. J. E. Toyner, chairman of the hail insurance commission, in an interview stated that this estimate had been made only after a complete survey of the province by the hail commission.

Mr. Toyner estimated that not over fifty per cent. of the loss through hail to the Saskatchewan farmers was covered by hail insurance of any kind.

The loss was considerably greater than that of last year. There were several reasons for this. In the first place, the area under crop this year was much greater than in any previous year. Another factor which tended to make the loss so much greater was the splendid crop which had been brought almost to maturity before they were damaged by frost.

In an ordinary year, in many instances, \$10 per acre would cover the damage to the crop, while this year it would take double this sum, owing to the heavy yield in most districts.

Catarth Cannot Be Cured

With LOCAL APPLICATIONS, as they are called, the catarrh of the bladder is a blood or constitutional disease, and cannot be cured by local remedies. Halls' Catarrh Cure is the only remedy that cures the blood and mucous surfaces. Halls' Catarrh Cure is a medicine. It is a regular prescription. It is composed of the best tonics known, combined with the best blood purifier, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for literature, free. J. J. CHENEY & CO., Props., Toledo, O. Sold by Druggists.

Take Halls' Family Pills for Constipation.

The War the Kaiser Wanted

When the Emperor declared the other day that he never wanted war, he said just what he wanted, but it was he who had slightly varied his phrase and said that he did not want this war, we should have had no difficulty in believing him. He wanted the short, sharp, crushing war of the German text books with Great Britain out of it with the seas at his disposal, with spiritless enemies who would have been taken by surprise, beaten in detail, and accepted the terms which he in his magnanimity had been pleased to propose to them—Westminster Gazette.

Cheapest of All Oils.—Considering the curative qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Cost of Stopping Trains

In the campaign which the Ohio railroads made to increase passenger rates in that state all kinds of statistics were filed with the legislature. Probably the statistics dealing with train stops, filed by President Willard of the Baltimore and Ohio, were among the most interesting. This memorandum asserted that it costs from \$1.25 to \$1.50 to stop a passenger train at a station on the Ohio road at an average of about \$1.40 a stop.

In other words, says the Wall Street Journal, a train making 17 stops there would be a cost to the railroad of \$27.50 for the starting and stopping alone. Assume the train entering into the cost of stopping a train, the most important is coal, for when a train is stopped the brakes are applied and the coal is used to generate the steam which compresses the air.

There is a great wear and tear on equipment because of these stoppages, and the car wheels, the brake shoes and the rails are worn away because of friction. In starting after a stop there is a great expenditure of steam in getting under headway, and there is more wear and tear on equipment.

Minard's Liniment for sale everywhere.

English Founder of Turkish Navy

The Turkish navy of the past owed almost its existence to an English sailor, Robert Pasha, a bold buccannier, who was born in the Victorian era.

He retired from the English navy in 1862, and during the American war he became a blockade runner with his own ship, the "Invincible."

After the war he entered the Turkish service, and by his energy and ability he was able to organize the navy from Greece and then reorganize the Turkish fleet so that the Sultan appointed him marshal of the empire.

Robert Pasha also enjoyed the unique distinction of being twice struck of the British navy list for breach of the foreign enlistment laws, and twice reinstated there. And he died in 1885 with the rank of a British vice-admiral.

Mr. and Mrs. Frederick Post are the happy parents of an eleven pound son, and are almost inclined to name him "Post." The Mercyrville (La.) Banner.

Barker—Did you tell him that he lied?

Gordon—No, he said so many words.

Barker—How, then, Barker?

Gordon—I told him he ought to be cutting out wireless news for the Kaiser.

German Rapid Fire

Each foot that the German gains, he waits in with an immense barrier of barbed wire and concrete.

Behind this jungle of wire, which is almost as impassable as a morass, are planted machine guns and the thousand, well protected with concrete and steel armor, and hidden from any but the sharpest eyes.

The machine gun, used on this scale, is a most effective land war in its hail of bullets charges wither and casualties by the thousand are piled up in a few minutes.

By the method of its mounting it is generally invulnerable to any but a direct hit and with it a single good shot and a couple of attendants can do the work of fifty or sixty marksmen.

On the French front by the lowest estimate the enemy has 50,000 of these guns; by the highest published 95,000, which would give one to every hundred yards of front.

Minard's Liniment Relieves Neuralgia.

The Empire Better

The die was cast a year ago. Neither the nation nor the empire regret it, as Sir Robert Borden declared, in words of eloquence and significance. As a year of war opens, we can already see on the horizon unmistakable signs of approaching deliverance from a carefully organized conspiracy against civilization and all it represents for the human race.

We can realize, in the words of the Canadian prime minister, that the empire is better worth fighting for and better worth dying for than it was a year ago—London Daily Telegraph.

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats.

Don't let impure fats and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood.

"Zambuk" is purely herbal. No poisonous coloring. Use it always. 50c. Box. At All Druggists and Stores.

USE ONLY ZAMBUK FOR CHILDREN'S SORES

Wise Hubby

"Does your husband ever lie to you?"

"Never."

"How do you know?"

"He tells me I do not look a day older than when he married me, and if he doesn't lie about that I don't think he would about less important matters."

Recent figures of the Japanese

which show that 55,000 Japanese subjects are living abroad. In the United States are 8,000; Hawaii, 30,000; the British Islands, 5,000; China, 115,000; Australia, 6,000; Canada, 12,000; France, 125; Great Britain, 478; and Germany, 474.

Judge (of divorce court)—Aren't you attached to your husband?

Plaintiff—Certainly. I came here to be detached.

SLUGS HARD

Tea and Coffee Are Sure and Powerful

Let the tea or coffee slave be denied his cup at its appointed time! Headache—stomach and intestinal troubles—constipation—these are the ailments which will persist in the use of coffee.

Yes, a western man.

He says further that he did not begin drinking coffee until he was twenty years old, and that slowly it began to poison him, and affect his hearing through his nervous system. (Tea produces about the same effect as coffee, because they both contain the drugs, caffeine and tannin.)

"Finally, I quit coffee and the conditions slowly disappeared, but one cold morning the smell of my wife's coffee was too much for me and I took a cup. Soon I was drinking my regular allowance, tearing down brain and nerves by the daily dose of the nefarious beverage."

"Later, I found my breath coming hard, had frequent fits of nausea, and then I was taken down with bilious fever."

"Common sense came to me and I quit coffee for the time being."

"But at once began to gain and have, had no returns of my bilious symptoms, headache, dizziness, or vertigo."

"I now have health, bright thoughts and added weight—long before there was invalidism and the blues."

"My brother quit coffee because of its effect on his health and now uses Postum. He could not stand the nervous strain while he suffered, but he was hospitalized at Le Touquet and the Postum."

Name given by Canadian Postum Co., Windsor, Ont.

Postum comes in two forms:

Postum Cereal—the original form—must be well boiled. 15c and 25c pack.

Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and with cream and sugar makes a delicious beverage instantly. 30c and 50c tins.

Both kinds are equally delicious and cost about the same per cup.

"Use both a treat for the stomach."

"There's a treat for the stomach."

Generous Feeding

Dairymen Should Feed Their Cows All They Will Eat

There are certain fixed charges, often called overhead charges, that are comparatively uniform in milk production. The cost of stabling, the space required per cow, taxes, insurance, delivery of milk, etc., will be very nearly the same. The one factor that will fluctuate will be the feed given. If the amount of feed consumed by the cow will give the results indicated, then it certainly is the interest of our dairymen to feed their cows all they will eat and yet keep up the flow of milk. There are dairies where the cows are being fed to this economic point. Some of the dairies have enormous overhead charges, yet in spite of this they were able to produce milk for fifteen cents per gallon. The secret lay in the extraordinary yields per cow. One dairymen has rather low overhead charges. He also feeds his cows the least amount possible. His milk flow per cow is very low, but he keeps up the flow of milk by feeding, and as a result it is costing him over forty cents per gallon to produce his milk.

If the milk flow is increased, the cost of production records were kept. It was found, in one particular instance that the cost of producing a gallon of milk with the 3,000 pound cow was about twenty-five cents per gallon, with the 6,000 pound cow was twenty cents per gallon, and with the 9,000-pound cow it was only fifteen cents per gallon. This great increase in the cost of milking per gallon is due to the increased flow per cow. The overhead charges are remaining the same. The only increase in cost was, for feed, which went into the production of milk.

No better protection against worms can be got than the Milner's Worm Powders. They consume worms and render the stomach and intestine unpropitious to the further growth of the worms that have been introduced by the ticks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made up of it, and that their operation is altogether health giving.

Signed by Allies and Greece

The Athens correspondent of the Havas Agency says that a final agreement has been signed by the Entente Powers and Greece concerning navigation and commerce.

Greece agrees to take the strictest measures for the suppression of trade in contraband articles, and the Entente nations consent to the free exportation of tobacco and raising on the basis of export statistics previous to the war and the importation from the British colonies of all goods exclusively reserved for individual consumption in Greece.

The result will be that thousands of Greek boats going from one Greek port to another will be correspondingly, will cease immediately.

Minard's Liniment Cures Burns, Etc.

"Why are your patients all so awfully plain?" a visitor to the Canadian hospital at Le Touquet asked the C.O.

"They are rather, aren't they?" he replied, "Well, you see, they like this. The ambulance cars all pass the Duchess of Blankminster's hospital and they get a good look at her. And of course, they don't want ugly or very badly wounded ones to make pets of and call 'Boo-Boo'—The Bylander."

"And when you eloped with the girl, asked your friend, did her father follow you?"

"Oh, he said the young man."

"Rather. He's living with us yet."

NINE GOOD REASONS

**Why You Should Subscribe to
The Canadian Patriotic Fund
To the Extent of Your Ability**

1. You owe to your country, and to the Empire to which we are part, either to fight yourself or help to make it possible for others to fight in this supreme struggle.
2. As a Canadian you have enjoyed the protection and privileges of British citizenship and have never yet been called upon in the defense of the Empire.
3. The Mother Country has for years practically borne the burden of your protection alone.
4. In this hour of trial we desire Great Britain to realize that every Canadian is supporting and upholding her cause.
5. The war in which we are engaged is a righteous cause, a struggle for Truth, Liberty and for the sacredness of Treaties and the given word.
6. If you can't go yourself, you can help to make it possible for others to go by guaranteeing that their families will be provided for in their absence.
7. The object of the Canadian Patriotic Fund is to make provision for all families of soldiers going from Canada to take part in the present war.
8. Those who have gone to the front are making greater sacrifices than anything we can do at home.
9. An unparalleled crisis in the world's history calls for supreme sacrifice on our part. We must do our duty. We must fight or pay.

**KOOTENAY LAKE,
B. C.**

Offers many opportunities to the man
or woman who wishes a home upon
make an investment in that prize-
winning district of British Columbia.
Those interested can secure the desired
information, as well as maps, beau-
tiful three-coloured magazines, regular
price 50c, but free if you mention where
you saw this advertisement, the amount
you have to invest, your nationality,
one reference, and also send names
and address of at least ten friends or
relatives who might be interested in
buying land in Kootenay lake district.
Our ranchers are making from \$250 to
\$1800 per year off from each bearing
acre-actual government reports. Land
selling at from \$50 to \$200 unimproved;
improved tracts from \$500 to \$2500.
No irrigation and its expensive up-
keep needed here. Plenty of rain; no
severe cold weather—lake 35 miles long,
and 5 miles wide—never freezes over;
unexcelled fishing, hunting and boating;
no crop failure in 80 years; no
severe storm such as hail, wind, or
lightning; no rainy season—its just
ideal from a climatic as well as an
financial standpoint.

Names of reliable real estate firms
furnished; where to buy the best land;
what to plant and when to plant it;
how to succeed in any business; and
other information furnished free.
Answer today as there is only a
limited number of tracts left for our
disposal. Enclose 10c silver post-
age, etc.

**SYNOPSIS OF CANADIAN NORTH-
WEST LAND REGULATIONS.**

THE sole head of a family, or any
male over 18 years old, may homestead
a quarter-section of available Dominion
land in Manitoba, Saskatchewan or
Alberta. Applicant must appear in
person at the Dominion Lands Agency or
Sub-Agency for the district. Entry by
proxy may be made through a Dominion
Lands Agency (but not Sub-Agency), on
certain conditions.

Duties—Six months' residence upon
and cultivation of the land in each of
three years. A homesteader may live
within nine miles of his homestead on a
farm of at least 80 acres, on certain con-
ditions. A habitable house is required
except where residence is performed in the
vicinity.

In certain districts a homesteader in
good standing may pre-empt a quarter-
section alongside his homestead. Price
\$3.00 per acre.

Duties—Six months residence in each
of three years after earning homestead
patent; also 50 acres extra cultivation.
Pre-emption patent may be obtained as
soon as homestead patent, on certain
conditions.

A settler who has exhausted his home-
stead right may take a pre-emption
patent in certain districts. Price \$3.00
per acre. Duties—Must reside six
months in each of three years, cultivate
fifty acres and erect a house worth
\$300.00.

The area of cultivation is subject to
reduction in case of rough, scrubby or rocky
land. Live stock may be substituted for
cultivation under certain conditions.

W. W. CORY, C.M.G.,
Deputy of the Minister of the Interior,
N.B.—Unauthorized publication of this
advertisement will not be paid for.

**PERHAPS you do not re-
alize how many lines
